I have just received, from Dr. Gary Huber, a letter dated July 20, 1976, to him from Dr. Edward Kass concerning a Dr. Nicholas Wald of Oxford, England, and the subject of carbon monoxide and its measurement. I am enclosing a copy of that letter for each of you.

The formalizing of the extension agreement on the Harvard project has been delayed somewhat at the request of Dr. Huber because of the absence of Mr. Meadow, Assistant Dean of the Harvard Medical School, with whom, as you will recall, we need to discuss the subject of both contract and overheard. Dr. Huber told me to await further word from him.

With best regards.

Sincerely,

David R. Hardy
